Project Design Phase I

Solution Fit

Project Title: Smart Lender-Applicant credibility prediction for loan approval

FOCUS ON J&P, TAP INTOBE

feel sad.It is easily attacked by

the hackers.

um ID: PNT2022TMID13791 Date: 17 October 2022 Maximum marks: 4 marks		
 1.CUSTOMERS SEGMENTS Bankers Loan Officers Organization Account Holders Type of Card User 	 6.CUSTOMER CONSTRAINTS Delay in approval of loan Unable to find the credit score Error in credibility of asset Financial in stable of customer 	5.AVAILABLE SOLUTIONS • Manually done on the based on credit score • Existing machine learning models that are not reliable and fail in abnormal condition of user
 2.JOBS-TO-BE-DONE/PROBLEMS Prediction of Loan Classification of yes or no Why declined of loan Arrangement of security No proper guidance Reference in lending loan Delay in sanctioning loan 	 9.PROBLEM ROOT CAUSE Its various from person to person and their financial condition. When the person is new to the bank and as no history of loan and credit score. When the defaulter increases risk it affect the evolutions of other user 	7.BEHAVIOUR • The user can select the type of loan and term. • High interest rate affect the user and their living condition.
 3.TRIGGERS Be visible to client Highlight require scheme Make loan interest as low Keep process short 	10.YOUR SOLUTION The proposed solution is the prediction of credit defaulters using classification algorithms and detect the credit risk evaluation. We use classification algorithms such as KNN and XGBOOOST algorithms	8.CHANNELS OF BEHAVIOUR ONLINE • Prediction of loan approval easily known • Credit score is visible • Bank statement
4.EMOTIONS BEFORE /AFTER When the loan is approved you feel joyed while its rejected we	that forecast the loan defaulters and predict loan approval	OFFLINE Submission of documents. No proper treatment of customer

Credit score and history

• affect the loan approval
